

EZYFORM VS TRADITIONAL FORMWORK

Features & Benefits	EzyForm	Yes	Traditional formwork	No
Long lasting	Indefinite usage	✓	3-4 uses on average	X
Safe	Made in high-vis so easy to see	✓	Tripping hazard, hard to see	X
Easy to clean	Minimal cleaning required	✓	Messy, fiddly, arduous and once wet, it swells	X
Saves time	Lightweight, easy to carry and easy to set up	✓	Heavy to lift and carry especially if wet	X
Flexible	Made from PVC plastic, flexible and easy to form into tricky angles	✓	Made from timber, restrictive and inflexible	X
Quality finish	Creates smoother, cleaner edges delivering a superior finish	✓	Becomes unreliable, rough finish	X
Cost savings	Smart long-term investment, spend less on formwork as one set can be reused again and again	✓	Restrictive use needing frequent replacement.	X
Convenient	Order online, have it delivered to your door	✓	Need to order and collect in person from timber yard after hand selecting specific straight lengths.	X
Environmentally friendly	Reusable and recyclable	✓	Limited shelf life, supports logging and deforestation.	X
Durability	Tough and durable with a smooth finish	✓	Porous and prone to rot and chipping.	X
Water resistant	Retains its current state	✓	Absorbs and swells	X
Size	6 metre lengths	✓	Length is approximate	X
Withstand deformation	Retains its current form	✓	Natural deterioration	X
Low maintenance	Easy to use and store	✓	Heavy and difficult to clean	X
Shape	Rigid enough that it retains its shape even after being wet	✓	Swells, twists and deforms easily. Splintered timber becomes porous	X
Transport & Storage	Easy to handle and stack. Its light weight form allows you to carry more and get the job done faster and equates to happier staff!	✓	Heavy to lift and store especially when wet. Splinters make it harder to handle. Equals unhappy or injured staff!	X
Australian made	Yes – EzyForm and all raw materials are Australian made.	✓	Unknown origins – could be local timber or foreign.	X
